

# QUALITY & COMPLIANCE

*We'll provide the tools to be more proactive and help you remediate issues quickly, when necessary.*

## WHAT WE DO

We help executives stay ahead of quality and compliance issues in addition to leading and supporting remediation activities, all while offering the best value for our client's money in the industry.

## HOW WE DO IT

### QMS Gap Assessments

- Leverage advanced analytics to identify common issues, gaps and opportunities for improvement across multiple regulatory and operational dimensions

### Capacity & Capability Gaps

- Our consultants play roles such as Quality Engineers, Deviation Investigators, CAPA SMEs, Change Control SMEs, Complaint Investigators, Method Validation SMEs, Sterility Assurance SMEs, and Technical Writers

### Predictive Investigations Application

- Leverage artificial and business intelligence to help anticipate avoidable delays in active investigations
- Cost-effective and easy to implement

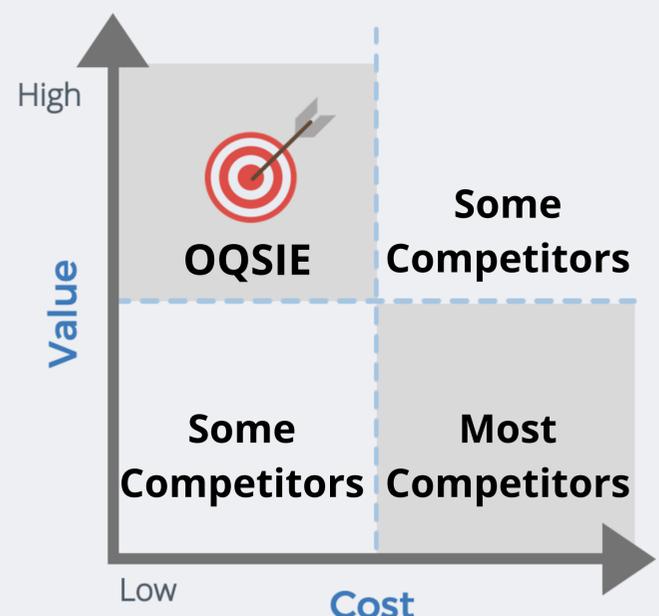

### Compliance Remediation

- Remediation program structure & launch
- 3rd party document reviews and quality system remediation

### Video-Enabled Remote Audits

- Conduct effective remote audits with our 360° camera and video conference technology
- In addition to our technology, we can supplement audit teams with experienced consultants
